CONSTRUCTION • MATERIAL HANDLING

# Tyroliner®

**TYRLYNER®** is a proprietary rubber urethane securely applied to the inside of a tire's casing to extend life and enhance safe operation. Its "self-healing" technology ensures the tire is sealed when punctured or cut by objects up to ¼" in diameter. The coating is applied at an OTR facility for original equipment manufacturers and distributors who support fleets and owner-operators engaged in construction work, where downtime is NOT an option.

**FOAM-FILL AND WHEEL EXCHANGE PROGRAM** OTR's offers a foam-fill and wheel exchange program to qualified dealers who service rental companies and end users who require immediate replacements for damaged tires. Dealers stock finished assemblies for replacement parts and draw from this stock to replace tires on a real-time basis. Wheels are retrieved, inspected and recirculated as needed. Tires are filled with an OEM-approved resin at an OTR facility, using a proven process so there is no chunking or air pockets which can lead to premature failure. Additionally, OTR has launched a portal to facilitate the end customer's ordering through the dealer/service provider, to provide a user-friendly closed-loop solution.

**OTR CAN DEVELOP CUSTOM SOLID TIRES FOR SELECT MATERIAL HANDLING VEHICLES.** Our brand—SOLIDBOSS®—is the preeminent brand in solid tires, preferred by OEMs and specified as original equipment for telehandlers, skid-steers and other vehicles. These tires are not only tough and long-lasting, they use apertures to absorb shock and cushion the ride for the operator, contributing to less fatigue on man and machine. Premium rubber compounds, ultra-deep and ultra-wide lugs, and reinforced sidewalls combine with solid tire construction to deliver a robust flat-prevention solution for fleets and owner-operators who cannot afford downtime. Consult with your OTR salesperson for more information.
