

OTR

SKID STEER LOADER

XT-41 is a game-changing “hybrid” tire blending R4 and R1 tread patterns for maximum flexibility when operating on- or off-road. Its high tread-to-void ratio improves wear when driving on asphalt with an overlapping centerline tread design for improved ride comfort. It also features rock ejectors in between lugs to ensure high performance when operating turf equipment in wet or muddy conditions. (This tire also works in UTV and agricultural applications.)
